

Information about your Vision and Medical Plan Coverage

Vision plans and medical plans both offer benefits that will help cover some, if not all, of the services and products you receive for your eye care. You may have both of these plans and our practice accepts both:

Vision care plans (such as VSP, EyeMed and VCP)

- Vision care insurance plans contribute to routine vision exams, eyeglasses and contact lenses. Vision care plans only cover basic screening for eye disease. They do not cover diagnosis, management or treatment of eye diseases.

Medical plans (such as BCBS, Humana, UHC, Medicare)

- Medical plans must be used if you have any eye health problems or systemic health problem that has ocular complication. Your doctor will determine if these conditions apply to you, but some are determined by your case history.

If you have both vision and medical plans, we will bill any medical related services to your medical

plans and any vision related services to your vision plan. We will use coordination of benefits to do this properly and to minimize your out-of-pocket expense.

We will bill your plan(s) for services if we are a participating provider for that plan, with benefits being paid by the insurance carrier directly to Valley Vision Center. If some fees are not paid by your plan, we will bill you for any unpaid deductibles, co-pays or non-covered services as allowed by the insurance contract. You are then responsible for payment of all services rendered on your behalf or your dependents.

This office utilizes the Optomap on every patient as part of the comprehensive eye exam. The Optomap retinal imaging fee may not be covered by your vision or medical insurance.

I have read and agree with these policies
